# Providing Process Satisfaction

SPX designs and manufactures products that deliver superior processing performance and dependability. We offer a complete line of sanitary valves, pumps, heat exchangers, homogenizers and mixers for today's modern processing facilities. From engineered components to customized systems, SPX helps you process food your way.

SPX offers:

- Trusted equipment brands
- Unparalleled process knowledge and technology
- Factory trained service technicians
- Extensive distribution channels

Contact us to find out more about our recently launched solutions that can help you maximize output and yield and minimize operating costs. Visit [www.spxft.com](http://www.spxft.com) for more information.
